Full-Stack Developer currently in the final semester of a degree in Systems Analysis and Development. Interning at Consisa Sistemas, working with AngularJS and Java, focusing on the maintenance and development of web systems. Previous experience in projects using ReactJS, Next.js, Tailwind CSS, Laravel, and Vue.js. Self-taught, passionate about technology, and committed to best coding practices and collaborative work. Always eager to learn new tools and contribute with creative and efficient solutions.

Experience

Dec 2023 – Jul 2024
Frontend Development Intern – Global Transportes – Toledo, PR

Frontend Development Intern – Global Transportes – Toledo, PR
During this internship, I worked as a front-end developer using technologies such as React.js, TypeScript, and the Next.js framework, as well as Tailwind CSS for styling. I developed a solid foundation in web development, enhancing my skills in creating efficient and responsive user interfaces. This experience also allowed me to collaborate closely with developers, designers, and stakeholders, improving my communication and teamwork abilities.

Aug 2024 – Feb 2025
Junior Full-Stack Developer – STW Automação – Lajeado, RS

I was responsible for full-stack development using Laravel and Vue.js, working on everything from data modeling and backend queries to frontend interface development. Later, I focused on frontend development for a project using React and Tailwind CSS. More recently, I joined the team responsible for implementing Siemens' system at Agrária's malting facility, contributing to the digitalization and automation of industrial processes.

Feb 2025 – Present
Estagiário em Desenvolvimento de Software Full-stack - Consisa Sistemas - Francisco Beltrão/PR

Currently working as a full-stack development intern at Consisa Sistemas, handling tasks related to the maintenance and enhancement of corporate systems. I work on both the frontend and backend, using AngularJS with Bootstrap for the UI and Java

for business logic and API integrations. This experience has significantly strengthened my technical skills and enhanced my problem-solving, analysis, and teamwork capabilities.

Personal Projects

- **Personal Portfolio**
  Link: https://github.com/PedroLeuchs/MyPortifolio

  I developed a modern and responsive portfolio using React, Tailwind CSS, and TypeScript, aiming to present my projects, technical skills, and career journey in a clear and appealing way. The project is organized following best practices, with clean code, strong typing using TypeScript, and efficient styling, resulting in a lightweight, accessible, and adaptable interface.

- **Household Task App**
  Link: https://github.com/PedroLeuchs/tarefa_domesticas_flutter

  A Flutter app focused on organizing and tracking household tasks. It features an intuitive interface that allows users to create, view, and manage tasks easily. This project helped deepen my understanding of mobile development with Flutter, state management, and project structure best practices.

- **Figma Jam – Industrial Recipe Flow**
  Link: **https://github.com/PedroLeuchs/figma-jam**

  This project was developed during a previous job experience to create an interactive interface that visually represents the entire industrial recipe flow—from silo ingredient output to final production. I used the React Flow library to create a dynamic drag-and-drop flowchart where each production step is visually represented. The project was built using React, TypeScript, and Tailwind CSS, resulting in a responsive and scalable UI. Although the project was not completed due to my departure from the company, most of the core features were implemented, showcasing my technical proficiency and ability to work with complex React libraries.

And many other projects – visit my GitHub for more.

Education

Feb 2023 – Present
Graduation in Systems Analysis and Development /Biopark Educação, Toledo, Paraná.

2019 – 2022
Technical Degree in Informatics /Federal Institute of Paraná, Assis Chateaubriand, Paraná
